

DIGITAL QC

MULTI-STAGE PROTECTION

Keep Mid-Level Office Equipment Functioning Properly

The Digital QC offers comprehensive power protection and filtering against harmful surges, spikes, EMI/RFI noise, electrical transients, and wiring faults to safeguard mid-level office equipment and a business's profitability.

The Digital QC's Multi-Stage protection and filtering technology allows the lowest amount of surge energy to reach connected equipment. Only a harmless remnant gets through to guarantee equipment receives stable power and functions properly. Its advanced filtration system virtually eliminates normal and common mode electronic noise interference that can cause error codes, malfunction and unnecessary service calls.

It also includes catastrophic over voltage shutdown protection to safeguard equipment from sustained over voltage events, Cat5e ETL verified network surge and telephone line protection, and wiring fault detection to ensure faultless installs.

Keep your mid-level office equipment and business up and running with the Digital QC.

Features:

- ▶ Patented Multi-Stage power protection and conditioning
- ▶ Advanced EMI/RFI noise filter
- ▶ Over voltage response time of 200 milliseconds
- ▶ Cat5e ETL Verified Network surge and telephone line protection (on all networked products)
- ▶ Power over Ethernet protection (on all networked products), and wiring fault protection (D5 series only)
- ▶ Easily installs behind or beside connected equipment

Model	Plug Config.	Outlet Config.	Network Protection
D5131NT	120V/15A	5-15R  x2	Yes
D5133NT	120V/15A	5-15R  x3	Yes
D5141NT	120V/20A	5-20R  x2	Yes
D5143NT	120V/20A	5-20R  x3	Yes
