

Surge Elimination at the Rack Level

The SurgeX Rack Mount product line offers comprehensive mains power protection and conditioning to safeguard AV equipment from harmful electrical transients that can cause malfunction and downtime.

Featuring Advanced Series Mode technology, they eliminate all surge energy to make sure the connected equipment is protected from surges, spikes, electrical transients and noise. They do not produce earth contamination or common-mode disturbances that cause hissing sounds and pixelation on AV equipment.

SurgeX technology includes Impedance Tolerant EMI/RFI filtration. Designed to remove both normal and common-mode noise, and be more forgiving of real-world source and load impedances, it ensures equipment receives clean and consistent power.

With SurgeX, your connected equipment will be protected from destructive spikes, surges, and inductive transients that can cause disruptions and catastrophic damage.

Features:

- ▶ Eliminates surge energy up to 6,000 volts
- ▶ Improves audio and video performance
- ▶ 100% fail safe, non-sacrificial components
- ▶ 2.44 m grounded 3-wire cord
- ▶ A-1-1 Certified

| Model | Power Config. | Outputs | Mains |
|----------|---------------|-------------|--------|
| SX-1210i | 10A / 240V | IEC C13 x11 | AS3112 |
| SX-2210 | 10A / 240V | AS3112 x7 | AS3112 |
| SX-1213i | 13A / 240V | IEC C13 x11 | BS1363 |
| SX-2213 | 13A / 240V | BS1363 x7 | BS1363 |
| SX-1215i | 15A / 240V | IEC C13 x11 | BS546 |
| SX-2215 | 15A / 240V | BS546 x7 | BS546 |
| SX-1216i | 16A / 240V | IEC C13 x11 | CEE77 |
